## Heating Guidelines

Reheat from frozen.

For best results, please heat pies in a conventional oven or pie heater rather than using a microwave. Leave the pie in its foil container. Place on a baking tray in the middle of the oven and heat for:

For a Pre-Heated Fan Assisted Oven/Gas oven:

1. Heating from Frozen - 40 minutes at 160°C (Gas Mark 4).
2. Heating after thawing out overnight in fridge - 20 minutes at 170°C (Gas Mark 5).

Adjust the times according to your particular oven as conventional ovens may take longer to heat the product than fan assisted ovens.

For warming in a pre-heated 'Pukka Pies' heater:

1. From frozen – 1½ hour on full.
2. After thawing in a fridge overnight - 1¼ hour on full.

For more detailed heating guidelines request a copy of our 'pie care sheets'.

These are only guidelines as appliances may vary.

Always check that food is piping hot throughout before serving.
