Heating Guidelines

Reheat from frozen. Keep the wrapper on.

For best results, please heat pies in a conventional oven or pie heater rather than using a microwave.

For a pre-heated Fan Assisted Oven/Gas oven:

1. Heating from Frozen - 40 minutes at 160°C (Gas Mark 4).

Adjust the times according to your particular oven as conventional ovens may take longer to heat the product than fan assisted ovens.

For warming in a pre-heated 'Pukka Pies' heater:

1. From frozen – 1 1/2 hour on full.

Take Special Care: When heating the pies, please line the shelf with foil or greaseproof paper to ensure that they are served in perfect conditions.

Turn heater down when hot to avoid burning. For more detailed heating guidelines request a copy of our 'pie care sheets'.

These are only guidelines as appliances may vary.

Always check that food is piping hot throughout before serving.
